10 — Abstract —

11 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Praesent convallis orci arcu, eu mollis dolor.
12 Aliquam eleifend suscipit lacinia. Maecenas quam mi, porta ut lacinia sed, convallis ac dui. Lorem
13 ipsum dolor sit amet, consectetur adipiscing elit. Suspendisse potenti.

14 **2012 ACM Subject Classification** Replace `ccsdsc` macro with valid one, e.g., ‘Information systems
15 → Question answering’

16 **Keywords and phrases** keyword one, keyword 2, three

17 **Digital Object Identifier** 10.4230/LIPIcs.CVIT.2016.23

18 **Category** Invited paper

19 **Related Version** A full version of the paper is available at <https://...>

20 **Supplementary Material** See code at <https://github.com/..> and data at <https://doi.org/...>

21 **Funding** (Optional) general funding statement ...

22 *John Q. Public* : (Optional) author-specific funding acknowledgements

23 **Acknowledgements** I want to thank ...

24 **1 Typesetting instructions – Summary**

25 LIPIcs is a series of open access high-quality conference proceedings across all fields in
26 informatics established in cooperation with Schloss Dagstuhl. In order to do justice to the
27 high scientific quality of the conferences that publish their proceedings in the LIPIcs series,
28 which is ensured by the thorough review process of the respective events, we believe that
29 LIPIcs proceedings must have an attractive and consistent layout matching the standard
30 of the series. Moreover, the quality of the metadata, the typesetting and the layout must
31 also meet the requirements of other external parties such as indexing service, DOI registry,
32 funding agencies, among others. The guidelines contained in this document serve as the
33 baseline for the authors, editors, and the publisher to create documents that meet as many
34 different requirements as possible.

35 Please comply with the following instructions when preparing your article for a LIPIcs
36 proceedings volume.

¹ Optional footnote, e.g. to mark corresponding author

37 **Minimum requirements**

- 38 ■ Use pdflatex and an up-to-date L^AT_EX system.
- 39 ■ Use further L^AT_EX packages and custom made macros carefully and only if required.
- 40 ■ Use the provided sectioning macros: `\section` (# in Markdown), `\subsection` (## in Markdown), `\subsubsection` (### in Markdown), `\paragraph` (#### in Markdown), `\paragraph*` (#### header {.unnumbered} in Markdown), and `\subparagraph*` (#### header {.unnumbered} in Markdown).
- 42 ■ Provide suitable graphics of at least 300dpi (preferably in PDF format).
- 44 ■ Use BibTeX and keep the standard style (`plainurl`) for the bibliography.
- 45 ■ Please try to keep the warnings log as small as possible. Avoid overfull `\hboxes` and any kind of warnings/errors with the referenced BibTeX entries.
- 46 ■ Use a spellchecker to correct typos.

49 **Mandatory metadata macros**

50 **NOTE:** *The following macros are set via the YAML header in the R Markdown template.*

51 Please set the values of the metadata macros carefully since the information parsed from these macros will be passed to publication servers, catalogues and search engines. Avoid placing macros inside the metadata macros. The following metadata macros/environments are mandatory:

- 55 ■ `\title` and, in case of long titles, `\titlerunning`.
- 56 ■ `\author`, one for each author, even if two or more authors have the same affiliation.
- 57 ■ `\authorrunning` and `\Copyright` (concatenated author names) \ The `\author` macros and the `\Copyright` macro should contain full author names (especially with regard to the first name), while `\authorrunning` should contain abbreviated first names.
- 58 ■ `\ccsdesc` (ACM classification, see <https://www.acm.org/publications/class-2012>).
- 59 ■ `\keywords` (a comma-separated list of keywords).
- 60 ■ `\relatedversion` (if there is a related version, typically the “full version’); please make sure to provide a persistent URL, e.,g., at arXiv.
- 61 ■ `\begin{abstract}... \end{abstract}`.

65 **Please do not ...**

66 Generally speaking, please do not override the `lipics-v2019`-style defaults. To be more specific, a short checklist also used by Dagstuhl Publishing during the final typesetting is given below. In case of **non-compliance** with these rules Dagstuhl Publishing will remove the corresponding parts of L^AT_EX code and *replace it with the `lipics-v2019` defaults*. In serious cases, we may reject the LaTeX-source and expect the corresponding author to revise the relevant parts.

- 72 ■ Do not use a different main font. (For example, the `times` package is forbidden.)
- 73 ■ Do not alter the spacing of the `lipics-v2019.cls` style file.
- 74 ■ Do not use `enumitem` and `paralist`. (The `enumerate` package is preloaded, so you can use `\begin{enumerate}[a]` or the like.)
- 75 ■ Do not use “self-made” sectioning commands (e.,g., `\bf My Paragraph`).
- 76 ■ Do not hide large text blocks using comments or `\iffalse ... \fi` constructions.
- 77 ■ Do not use conditional structures to include/exclude content. Instead, please provide only the content that should be published – in one file – and nothing else.

80 ■ Do not wrap figures and tables with text. In particular, the package `wrapfig` is not
81 supported.

82 ■ Do not change the bibliography style. In particular, do not use author-year citations.
83 (The `natbib` package is not supported.)

84 This is only a summary containing the most relevant details. Please read the com-
85 plete document “LIPICs: Instructions for Authors and the `lipics-v2019` Class” for all
86 details and don’t hesitate to contact Dagstuhl Publishing (<mailto:publishing@dagstuhl.de>)
87 in case of questions or comments: [http://drops.dagstuhl.de/styles/lipics-v2019/lipics-v2019-](http://drops.dagstuhl.de/styles/lipics-v2019/lipics-v2019-authors/lipics-v2019-authors-guidelines.pdf)
